November 20, 2013

Gov. Martin O'Malley
State House
100 State Circle
Annapolis, MD 21401

Dear Gov. O'Malley:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Maryland, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Maryland, the economic cost will be $11.5 billion in lost gross state product, 4,062 jobs lost, and $5.9 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Maryland National Guard, as well as the maintenance and improvement of facilities like the Fort Detrick and Aberdeen Proving Ground will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Maryland alone, our universities serve 167,301 students, employ 36,465 people, and conduct $2.7 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Maryland ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Maryland will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Best regards,

Marion C. Blakely
President and CEO
Aerospace Industries Association

Hunter Rawlings
President
Association of American Universities

Peter McPherson
President
Association of Public and Land-grant Universities
Gov. Deval Patrick  
State House  
Office of the Governor  
Boston, MA 02133

Dear Gov. Patrick:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Massachusetts, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Massachusetts, the economic cost will be $6.1 billion in lost gross state product, 4,062 jobs lost, and $3.1 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Massachusetts National Guard, as well as the maintenance and improvement of facilities like the Otis Air National Guard Base and Air Station Cape Cod will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Massachusetts alone, our universities serve 165,397 students, employ 50,530 people, and conduct $2.1 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Massachusetts ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org.
Additionally, funding for Head Start, airports, and transit systems in Massachusetts will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Tom Corbett  
225 Main Capitol Bldg.  
Harrisburg, PA 17120  

Dear Gov. Corbett:  

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Pennsylvania, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Pennsylvania, the economic cost will be $7.9 billion in lost gross state product, 4,062 jobs lost, and $4 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Pennsylvania National Guard, as well as the maintenance and improvement of facilities like the Tobyhanna Army Depot and Carlisle Barracks will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Pennsylvania alone, our universities serve 163,502 students, employ 56,358 people, and conduct $2.9 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Pennsylvania ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Pennsylvania will continue to be negatively impacted.
If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Pat McCrory
116 W. Jones St.
Raleigh, NC 27603-8001

Dear Gov. McCrory:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of North Carolina, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of North Carolina, the economic cost will be $3.0 billion in lost gross state product, 4,062 jobs lost, and $1.5 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the North Carolina National Guard, as well as the maintenance and improvement of facilities like the Fort Bragg and Cherry Point MC Air Station will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In North Carolina alone, our universities serve 199,191 students, employ 54,672 people, and conduct $2.3 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in North Carolina ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in North Carolina will
continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Jan Brewer
State Capitol, West Wing
1700 W. Washington, 9th Fl.
Phoenix, AZ 85007

Dear Gov. Brewer:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Arizona, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Arizona, the economic cost will be $4.9 billion in lost gross state product, 4,062 jobs lost, and $2.5 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Arizona National Guard, as well as the maintenance and improvement of facilities like the Fort Huachuca and Davis-Monthan Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Arizona alone, our universities serve 153,486 students, employ 24,285 people, and conduct $997 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Arizona ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Arizona will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Salt Lake City, UT 84114

Dear Gov. Herbert:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Utah, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Utah, the economic cost will be $1.6 billion in lost gross state product, 4,062 jobs lost, and $821 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Utah National Guard, as well as the maintenance and improvement of facilities like the Tooele Army Depot and Dugway Proving Ground will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Utah alone, our universities serve 78,180 students, employ 12,775 people, and conduct $588 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Utah ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Utah will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Juneau, AK 99811

Dear Gov. Parnell:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Alaska, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Alaska, the economic cost will be $1 billion in lost gross state product, 4,062 jobs lost, and $533 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Alaska National Guard, as well as the maintenance and improvement of facilities like the Fort Greely and Eareckson Air Station will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Alaska alone, our universities serve 16,370 students, employ 2,915 people, and conduct $175 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Alaska ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Alaska will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Steve Beshear
700 State Capitol
Frankfort, KY 40601

Dear Gov. Beshear:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Kentucky, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Kentucky, the economic cost will be $2.9 billion in lost gross state product, 4,062 jobs lost, and $1.5 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Kentucky National Guard, as well as the maintenance and improvement of facilities like the Fort Campbell and Fort Knox will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Kentucky alone, our universities serve 57,504 students, employ 18,533 people, and conduct $575 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Kentucky ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Kentucky will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Best regards,

Marion C. Blakely

November 20, 2013

Dear Gov. Dalrymple:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of North Dakota, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of North Dakota, the economic cost will be $348 million in lost gross state product, 4,062 jobs lost, and $177 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the North Dakota National Guard, as well as the maintenance and improvement of facilities like the Minot Air Force Base and Grand Forks Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In North Dakota alone, our universities serve 34,787 students, employ 5,400 people, and conduct $209 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in North Dakota ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in North Dakota will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

November 20, 2013

Gov. Neil Abercrombie  
5 State Capitol  
Honolulu, HI 96813

Dear Gov. Abercrombie:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Hawaii, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Hawaii, the economic cost will be $1.1 billion in lost gross state product, 4,062 jobs lost, and $547 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Hawaii National Guard, as well as the maintenance and improvement of facilities like the Kunia Field Station and Hickam Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Hawaii alone, our universities serve 23,898 students, employ 4,778 people, and conduct $318 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Hawaii ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Hawaii will continue to be negatively impacted. If
Sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Dear Gov. Martinez:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of New Mexico, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of New Mexico, the economic cost will be $2.9 billion in lost gross state product, 4,062 jobs lost, and $1.5 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the New Mexico National Guard, as well as the maintenance and improvement of facilities like the White Sands Missle Range and Holloman Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In New Mexico alone, our universities serve 56,670 students, employ 13,311 people, and conduct $403 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in New Mexico ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in New Mexico will continue to be negatively impacted.
If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. 203 State Capitol
Atlanta, GA 30334

Dear Gov. Deal:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Georgia, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Georgia, the economic cost will be $5.5 billion in lost gross state product, 4,062 jobs lost, and $2.8 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Georgia National Guard, as well as the maintenance and improvement of facilities like the Fort Stewart and Hunter Army Airfield will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Georgia alone, our universities serve 143,935 students, employ 35,073 people, and conduct $1.5 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Georgia ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Georgia will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Brian Sandoval
Executive Chambers
Capitol Complex
Carson City, NV 89710

Dear Gov. Sandoval:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Nevada, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Nevada, the economic cost will be $1 billion in lost gross state product, 4,062 jobs lost, and $533 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Nevada National Guard, as well as the maintenance and improvement of facilities like the Nellis Air Force Base and Indian Springs Air Force Auxiliary Field will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Nevada alone, our universities serve 54,756 students, employ 7,184 people, and conduct $129 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Nevada ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Nevada will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Gov. Rick Perry
State Capitol
P.O. Box 12428
Austin, TX 78711

Dear Gov. Perry:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Texas, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Texas, the economic cost will be $16.0 billion in lost gross state product, 4,062 jobs lost, and $8.2 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Texas National Guard, as well as the maintenance and improvement of facilities like the Fort Bliss and Kingsville Naval Air Station will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Texas alone, our universities serve 419,541 students, employ 62,028 people, and conduct $2.1 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Texas ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Texas will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Jefferson City, MO 65102

Dear Gov. Nixon:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Missouri, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Missouri, the economic cost will be $5.1 billion in lost gross state product, 4,062 jobs lost, and $2.6 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Missouri National Guard, as well as the maintenance and improvement of facilities like the Fort Leonard Wood and Marine Safety Office St. Louis will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Missouri alone, our universities serve 106,781 students, employ 37,640 people, and conduct $1.0 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Missouri ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Missouri will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Gov. Sam Brownback
Two State Capitol
Topeka, KS 66612-1590

Dear Gov. Brownback:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Kansas, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Kansas, the economic cost will be $1.4 billion in lost gross state product, 4,062 jobs lost, and $711 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Kansas National Guard, as well as the maintenance and improvement of facilities like the Fort Riley and McConnell Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Kansas alone, our universities serve 78,084 students, employ 15,531 people, and conduct $522 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Kansas ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Kansas will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Baton Rouge, LA 70804-9004

Dear Gov. Jindal:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Louisiana, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Louisiana, the economic cost will be $2.9 billion in lost gross state product, 4,062 jobs lost, and $1.5 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Louisiana National Guard, as well as the maintenance and improvement of facilities like the Camp Beauregard and Military Safety Unit Houma will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Louisiana alone, our universities serve 87,609 students, employ 16,363 people, and conduct $564 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Louisiana ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in Louisiana will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Best regards,

Marion C. Blakely  
President and CEO  
Aerospace Industries Association

Hunter Rawlings  
President  
Association of American Universities

Peter McPherson  
President  
Association of Public and Land-grant Universities
Gov. Billy Haslam  
State Capitol  
Nashville, TN 37243-0001  

Dear Gov. Haslam:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Tennessee, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Tennessee, the economic cost will be $3.9 billion in lost gross state product, 4,062 jobs lost, and $2 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Tennessee National Guard, as well as the maintenance and improvement of facilities like the Holston Army Ammunition Plant and Millington Naval Hospital will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Tennessee alone, our universities serve 114,506 students, employ 44,467 people, and conduct $800 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Tennessee ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Tennessee will continue to be negatively impacted. If
seqestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Phil Bryant
P.O. Box 139
Jackson, MS 39205

Dear Gov. Bryant:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Mississippi, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Mississippi, the economic cost will be $1.2 billion in lost gross state product, 4,062 jobs lost, and $598 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Mississippi National Guard, as well as the maintenance and improvement of facilities like the Camp Shelby and Naval Air Station Meridian will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Mississippi alone, our universities serve 78,925 students, employ 12,209 people, and conduct $466 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Mississippi ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Mississippi will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Mayor Vincent Gray
One Judiciary Square
441 Fourth St., NW
Washington, D.C. 20001

Dear Mayor Gray:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of District of Columbia, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of District of Columbia, the economic cost will be $12.8 billion in lost gross state product, 4,062 jobs lost, and $6 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the District of Columbia National Guard, as well as the maintenance and improvement of facilities like the Fort Myer and Naval Observatory will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In District of Columbia alone, our universities serve 11,084 students, employ 1,508 people, and conduct $4.4 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in District of Columbia ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org.
Additionally, funding for Head Start, airports, and transit systems in District of Columbia will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Maggie Hassan
208-214 State House
Concord, NH 03301

Dear Gov. Hassan:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of New Hampshire, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of New Hampshire, the economic cost will be $634 million in lost gross state product, 4,062 jobs lost, and $323 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the New Hampshire National Guard, as well as the maintenance and improvement of facilities like the Portsmouth Naval Shipyard and One Coast Guard Station will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In New Hampshire alone, our universities serve 16,611 students, employ 3,644 people, and conduct $143 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in New Hampshire ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org.
Additionally, funding for Head Start, airports, and transit systems in New Hampshire will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Bob McDonnell
State Capitol
Richmond, VA 23219

Dear Gov. McDonnell:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Virginia, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Virginia, the economic cost will be $20.9 billion in lost gross state product, 4,062 jobs lost, and $10.6 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Virginia National Guard, as well as the maintenance and improvement of facilities like the Fort Lee and Reserve Training Center Yorktown will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Virginia alone, our universities serve 155,471 students, employ 28,291 people, and conduct $1.0 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Virginia ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Virginia will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. John Hickenlooper
136 State Capitol Bldg.
Denver, CO 80203-1792

Dear Gov. Hickenlooper:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Colorado, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Colorado, the economic cost will be $4.3 billion in lost gross state product, 4,062 jobs lost, and $2.2 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Colorado National Guard, as well as the maintenance and improvement of facilities like the Fort Carson and Rocky Mountain Arsenal will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Colorado alone, our universities serve 108,297 students, employ 24,143 people, and conduct $1.2 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Colorado ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Colorado will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic
security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find
an alternative to sequestration before the next round of cuts begins in January. We have also
pressed our case with Congress and the administration and stand ready to support and bolster
your efforts as well. Clearly, the impacts of sequestration to the economy, to national security
and to the provision of critical services are significantly damaging. Please let us know if there is
further information we can provide as you continue to communicate these adverse impacts to
your congressional delegation.

Best regards,

November 20, 2013

Gov. Pat Quinn
207 State Capitol Bldg.
Springfield, IL 62706

Dear Gov. Quinn:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Illinois, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Illinois, the economic cost will be $5.4 billion in lost gross state product, 4,062 jobs lost, and $2.7 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Illinois National Guard, as well as the maintenance and improvement of facilities like the Rock Island Arsenal and Scott Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Illinois alone, our universities serve 193,144 students, employ 55,839 people, and conduct $2.1 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Illinois ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Illinois will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. Andrew Cuomo
State Capitol
Albany, NY 12224

Dear Gov. Cuomo:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of New York, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of New York, the economic cost will be $7.0 billion in lost gross state product, 4,062 jobs lost, and $3.6 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the New York National Guard, as well as the maintenance and improvement of facilities like the Fort Drum and Sector Long Island Sound will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In New York alone, our universities serve 228,759 students, employ 71,983 people, and conduct $3.4 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in New York ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in New York will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic
security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find
an alternative to sequestration before the next round of cuts begins in January. We have also
pressed our case with Congress and the administration and stand ready to support and bolster
your efforts as well. Clearly, the impacts of sequestration to the economy, to national security
and to the provision of critical services are significantly damaging. Please let us know if there is
further information we can provide as you continue to communicate these adverse impacts to
your congressional delegation.

Gov. Paul LePage
State House Station 1
Augusta, ME 04333

Dear Gov. LePage:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Maine, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Maine, the economic cost will be $731 million in lost gross state product, 4,062 jobs lost, and $372 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Maine National Guard, as well as the maintenance and improvement of facilities like the Brunswick Naval Air Station and Sector Northern New England will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Maine alone, our universities serve 12,910 students, employ 2,507 people, and conduct $112 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Maine ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Maine will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Gov. Terry Branstad
State Capitol Bldg.
Des Moines, IA 50319

Dear Gov. Branstad:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Iowa, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Iowa, the economic cost will be $1.1 billion in lost gross state product, 4,062 jobs lost, and $569 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Iowa National Guard, as well as the maintenance and improvement of facilities like the Iowa Army Ammunition Plant and Sector Upper Mississippi River will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Iowa alone, our universities serve 66,332 students, employ 16,136 people, and conduct $711 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Iowa ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Iowa will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Idaho, the economic cost will be $1.1 billion in lost gross state product, 4,062 jobs lost, and $536 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Idaho National Guard, as well as the maintenance and improvement of facilities like Mountain Home Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Idaho alone, our universities serve 62,003 students, employ 6,982 people, and conduct $142 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Idaho ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head
Start, airports, and transit systems in Idaho will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Best regards,

Gov. Mike Pence  
206 State House  
Indianapolis, IN 46204

Dear Gov. Pence:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Indiana, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Indiana, the economic cost will be $2.4 billion in lost gross state product, 4,062 jobs lost, and 1.2 billion in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Indiana National Guard, as well as the maintenance and improvement of facilities like Naval Weapons Support Center will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Indiana alone, our universities serve 152,820 students, employ 31,477 people, and conduct $1.1 billion in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Indiana ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Indiana will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

St. Paul, MN 55155

Dear Gov. Dayton:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Minnesota, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequestration of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Minnesota, the economic cost will be $1.6 billion in lost gross state product, 4,062 jobs lost, and $821 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Minnesota National Guard, as well as the maintenance and improvement of facilities like Marine Safety Office Duluth will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Minnesota alone, our universities serve 76,592 students, employ 18,891 people, and conduct $870 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Minnesota ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Minnesota will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Gov. Steve Bullock
204 State Capitol
Helena, MT 59620

Dear Gov. Bullock:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Montana, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Montana, the economic cost will be $507 million in lost gross state product, 4,062 jobs lost, and $258 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Montana National Guard, as well as the maintenance and improvement of facilities like Malstrom Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Montana alone, our universities serve 34,544 students, employ 5,588 people, and conduct $186 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Montana ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Montana will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Your voice is an important one for congressional budget negotiators to hear as they work to find an alternative to sequestration before the next round of cuts begins in January. We have also pressed our case with Congress and the administration and stand ready to support and bolster your efforts as well. Clearly, the impacts of sequestration to the economy, to national security and to the provision of critical services are significantly damaging. Please let us know if there is further information we can provide as you continue to communicate these adverse impacts to your congressional delegation.

Gov. John Kitzhaber
254 State Capitol
Salem, OR 97310

Dear Gov. Kitzhaber:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of Oregon, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of Oregon, the economic cost will be $1.2 billion in lost gross state product, 4,062 jobs lost, and $613 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the Oregon National Guard, as well as the maintenance and improvement of facilities like Kingsley Field Air National Guard Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In Oregon alone, our universities serve 99,407 students, employ 12,666 people, and conduct $391 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in Oregon ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for Head Start, airports, and transit systems in Oregon will continue to be negatively impacted. If
sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.

Dear Gov. Daugaard:

On behalf of the Aerospace Industries Association, the Association of American Universities, and the Association of Public and Land-grant Universities, we thank you for your public service to the people of South Dakota, and we write to ask that you continue to communicate with your congressional delegation about the negative impact of sequestration on your state.

AIA represents nearly 380 member companies, embodying every high-technology manufacturing segment of the U.S. aerospace and defense industry, and AAU and APLU together represent 238 university campuses and systems across the country, including most of the major public and private U.S. research universities. We recognize the difficulties you face delivering services to your communities, and fostering job growth and economic prosperity. Unfortunately, the federal sequester of critical activities stands in the way of those efforts. As the National Governors Association stated in a letter to Congress earlier this year, “Sequestration is a blunt instrument for a complex but solvable problem.”

According to George Mason University economist Dr. Stephen Fuller, federal sequestration will cost the U.S. economy $215 billion, 2.14 million jobs, and $109 billion in lost wages. In your state of South Dakota, the economic cost will be $473 million in lost gross state product, 4,062 jobs lost, and $241 million in lost wages. On top of that, funding for many federally mandated activities and other public services will be reduced. Furthermore, funds for modernization of the South Dakota National Guard, as well as the maintenance and improvement of facilities like Ellsworth Air Force Base will likely be reduced just as Washington is discussing another round of Base Realignment and Closure.

Sequestration is also having a devastating impact on higher education institutions in your state, which produce the next generation of talent and discoveries that power the economy forward. In South Dakota alone, our universities serve 30,933 students, employ 4,005 people, and conduct $130 million in research. Continued declines in important federal investments such as scientific research and higher education will drive up our country’s innovation deficit and make economic growth in South Dakota ever more challenging. For information on the impacts of sequestration to higher education research, please visit www.scienceworksforus.org. Additionally, funding for
Head Start, airports, and transit systems in South Dakota will continue to be negatively impacted. If sequestration is not eliminated or reduced now, the effects on our national and economic security, including the effects on every state and locality will be felt for years.
