A prosperous, secure America needs scientists and engineers for the future... but will we have them?

Here's the recent picture:

As U.S. spending for physical sciences and engineering research has declined, so have science and engineering degrees. Students get the picture!

Mr. President and Members of Congress:
Reverse the trend! Increase funding for basic research in physical sciences and engineering and let our students know that there is a future in science!

Innovation is America’s Economic Heartbeat.
Don’t Flat Line our Future!
