

Employer-Provided Educational Assistance Benefits

Internal Revenue Code Section 127

What are Employer-Provided Educational Assistance Benefits?

Section 127 allows employers to offer their employees up to \$5,250 annually in tax-free educational assistance for undergraduate or graduate-level courses.

Tax-free educational assistance benefits include payments for tuition, fees and similar expenses, books, supplies, and equipment. The payments do not have to be for work-related courses.

Employers are not required to provide assistance under Section 127 to their employees. But if an employer chooses to do so, the benefit must be offered to all employees on a nondiscriminatory basis that does not favor highly compensated employees.

Employers that provide their employees with Section 127 educational assistance benefits can deduct these costs as a business expense in determining their income tax liability. Employers that provide this benefit must have a written qualified educational assistance program that applies exclusively to their employees (including retired, disabled or laid off employees).

Employees cannot use the same educational expenses paid for or reimbursed through an employer-provided Section 127 educational assistance program as the basis for claiming other

federal tax benefits. However, employees may be able to claim other federal tax benefits, such as the American Opportunity Tax Credit (AOTC), for tuition and fees in excess of the \$5,250 Section 127 limit.

Section 127 was permanently extended by the American Taxpayer Relief Tax Act of 2012, although the annual limit of \$5,250 has not been increased in almost 40 years.

Who Benefits?

In academic year 2011-2012, Section 127 enabled an estimated 850,000 U.S. workers (8 percent of all undergraduates and 20 percent of graduate students) to pursue higher education courses and degrees that develop and expand critical skills needed to compete in our growing global economy. In fact, the top three undergraduate majors among Section 127 recipients were health care (20 percent), business (19 percent), and STEM – sciences, technology, engineering, and mathematics (13 percent). Similarly, the top three graduate majors for Section 127 recipients were education (29 percent), business (22 percent), and health care fields (14 percent). Section 127 is thus an efficient, cost-effective vehicle for training and improving the U.S. workforce (NPSAS 2012).

Employers provide Section 127 educational assistance benefits because they recognize the value and reap the return on their investment in their employees' continued education and training. The average Section 127 benefit received in 2012 was \$5,852 for graduate students and \$2,819 for undergraduate students (NPSAS, 2012).
